

Introducing NEO Pro 4.1 from Caelo Software

Outlook the way it should be!

All the features you need to solve your email overload

Also spending too much time on your emails?

Too many hours are wasted each day dealing with too many unimportant emails. Prioritizing, filing and dealing with messages – most of it is of little added value.

NEO Pro now automatically organizes your emails as they come in – so you don't have to. You can now focus on those emails that really matter and leave the rest to NEO Pro.

Need to find a message? It's a breeze using NEO Pro's automatic Virtual Folder structure and lightning fast indexed Search facility. Never without your messages anymore – they are at your fingertips all the time.

Exactly how it should be!

A major breakthrough in email productivity

Caelo Software not only provides the necessary technology to truly solve your email overload. Combining NEO Pro with the best time-management workflow principles will revolutionize your daily email activities. Saving up to 2 hours per day – reducing your email related stress levels with an average of 50% – and keeping you better than ever in control over your emails.

This Email Efficiency Support, to help you get the maximum out of your NEO Pro, is now provided free of charge on www.emailorganizer.com.

"This is how Outlook should have been designed."

What's new in NEO Pro 4.1

The latest NEO Pro version further enhances available functionalities for implementing time-management compliant workflow principles by allowing automatic assignment of categories through NEO Rules. Further, the lightning fast search feature is now accessible in all views right above the message listing. Unique is its capability to either search all messages or just the local (virtual) folder to quickly get focused results.

Application Notes and Online Email Training are complementing Technology

Technology in itself will not provide a solution for your daily email overload problems. Only by combining the available tools with an effective workflow will the potential improvements be achieved. Caelo Software already released a series of Application Notes providing a sound theoretical framework and practical implementation guidelines for its users. New is the release of the Online Email Training with clear step-by-step instructions to achieve significant time savings per day. You will find the Online Email Training here:

<http://www.emailorganizer.com/training/training.php>.

Easy workflow implementation

Active Mail, To Do and Follow-Up.
A natural separation of what matters.

Finding emails never has been easier

Frequently used Virtual Folders directly accessible without additional mouse clicks:

- Categories
- and Correspondent Folders

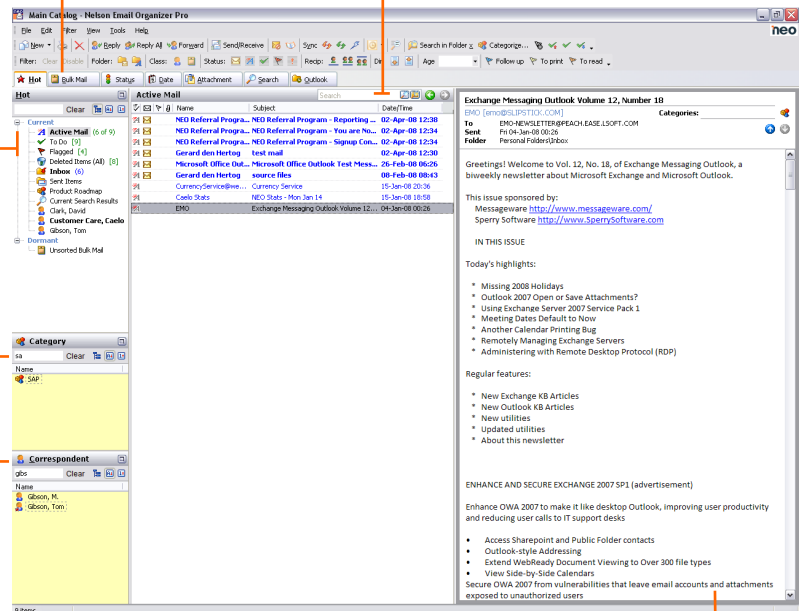

... combined with Search will all your searches return focused results in seconds.

Bulk Mail automatically organizes subscription email

Using Active Mail will keep subscription email organized outside the inbox.

Search entry box available in all views

"Search all Mails" or "Search local Folder"

Reading Pane on right hand side of the window

Maximizing use of wider screens providing comfortable reading size.

"NEO is a lifesaver ..."
